Our Mission

River's Edge, a highly skilled nursing center, is accredited by the Joint Commission on Accreditation of Healthcare Organizations (JCAHO). Setting the standard in providing high quality care, River's Edge offers Long Term Care and Sub-Acute/Rehabilitative Services.

THE CENTER FOR LONG TERM CARE SERVICES

At River's Edge, we provide a comfortable, home-like environment where residents can continue living life with dignity and respect. Our philosophy of care is "supported independence" and we provide the following comprehensive services:

- Medical Management
- Post Surgical Care
- Rehabilitation
- Hospice (including Respite Hospice)
- Social & Recreational Activities
- Respite (Short Term Stays)

Individualized Care Plans are established for each resident and family members are encouraged to participate in establishing the Plan. We understand the special bond between you and your loved one, and we will do our best to help maintain and strengthen that bond. At River's Edge, we will do everything we can to accommodate your needs.

Inpatient Hospice Services at River's Edge is teamed up with various Hospice providers to give additional specialized end of life care and palliative care. Respite care is also available for shorter stays.

Sub-Acute & Rehabilitative Services

The therapy unit offers a full range of comprehensive sub-acute and rehabilitative services to those patients who are well enough to leave the hospital but not yet ready to return home. We understand the difficulties that may arise after an acute illness or accident. We strive to provide quality care, in a warm and comfortable setting.

TEAM COORDINATED SERVICES – Our services are team-coordinated among our compassionate staff of professional caregivers including physicians, physiatrists, physical therapists, occupational therapists, speech therapists, recreational therapists, psychologists, rehabilitation nurses, case managers, dietitians and social workers.

Individualized Care Plans and one-to-one treatment programs focus on measurable outcomes helping each patient adapt and/or recover in the shortest period of time.
